

Cloud Computing

Why Cloud Computing?

- **No CapEx.** Receive cutting-edge, scalable technologies and services without capital investments. There's no expensive hardware to buy and no worries of technological obsolescence.
- **Scalable.** Easily expand or contract to accommodate seasonal peaks and valleys, and augment as your business grows.
- **Business Continuity / Disaster Recovery.** With XO Cloud Computing, everything is in the cloud with geographic, data center and equipment redundancy.
- **Simple.** XO manages the cloud and the network so you don't have to. Instead, you can focus on projects that are core to your business operations.
- **Self-Service Management.** XO solutions feature online portals, keeping important information at your fingertips.
- **24/7 Support, Robust SLAs.** With XO, you can count on robust SLAs, but should you require assistance, experts are ready to help, 24/7.

XO Communications provides cloud solutions that enable businesses to be more agile while controlling costs and reducing infrastructure support risks.

Reduce costs while also increasing reliability, scalability, performance and security in a high-availability, business-critical hosting environment. From enterprise-class cloud infrastructure services that provide the best qualities of the public cloud to cloud storage with its safe and secure placement, storage and retrieval of data from anywhere via the Internet, XO has a cloud computing solution to match your business requirements. With XO Cloud Backup and Disaster Recovery, you can be prepared when the unthinkable strikes with managed cloud-based or LAN-based backups and 24x7 disaster recovery support.

Cloud Express

XO Cloud Express brings together the flexibility, availability and community of the public cloud with enterprise levels of security, performance and control. With 100% availability Service Level Agreements (SLAs), strong encryption, VLAN networking, VPN and private network access support, role-based administrative controls and an open API, XO's hosting solutions are ready to address any enterprise concern. XO Cloud Servers, our cloud-based computing service, can be linked by XO Cloud Networks, our customer-controlled network configuration services. Customers can configure VLANs between servers, configure ACL-based firewalls and manage administrative usage. Data is encrypted at rest and while being transferred. Rather than implementing our network security on top of our virtualized servers, XO Cloud Networks is a truly network-based implementation running within our Cisco switching fabric. Customers manage and configure XO Cloud Networks via the web-based XO Cloud Express Portal or Open API.

Cloud Backup And Disaster Recovery

With XO Cloud Backup and Disaster Recovery services, you can store and protect your data in our ironclad cloud, and access it as needed—safely, efficiently, and easily, directly through the Internet, without additional capital or IT expenses. Cloud Backup and Disaster Recovery Service is a managed service that enables you to rapidly recover your mission-critical data and systems in our cloud after a disaster. Recovery times are minimal and backed up with 4-, 24- or 48-hour SLA options. Trust XO Cloud Disaster Recovery specialists to manage it all—from disaster recovery planning and testing through the execution of actual recovery processes. All you need is an Internet connection to remotely access your recovered systems and data in our secure, purpose-built cloud.

Cloud Files Express

Securely store and retrieve any amount of data, at anytime, from anywhere on the web. XO Cloud Files Express provides an API-based file storage solution designed to allow secure storage and retrieval of data from anywhere with Internet connectivity. Files are securely stored in an encrypted format and are accessible via SSL-encrypted API calls, as well as by web browser. Customers can create multiple storage accounts, each with its own administrative password, allowing the creation of isolated file stores. Each account can be configured to store up to 10 TB of data. XO Cloud Files Express is hosted in one of the XO Communications' top-tier networks.
